#  User Flow & UX Document: Smart Khadem Scheduler

## 1. Persona: The Group Leader (Sar-Gorouh)
* **Goal:** Create a fair, error-free shift schedule in under 2 minutes.
* **Pain Points:** Manual data entry, human error in rotation, constant phone calls for leave.

## 2. Step-by-Step Flow

### Step A: Attendance Sync
1. App fetches confirmed attendees from the Database.
2. User sees a summary: "38 Ready, 2 On Leave, 4 Late Arrival".
3. *UX Touch:* Late arrivals are highlighted in Orange.

### Step B: The "One-Click" Generation
1. User clicks **"Auto-Generate Schedule"**.
2. System applies the **Zone-Locking Logic**.
3. UI populates the Grid with Khadem Names.

### Step C: Fine-Tuning (The Drag & Drop Experience)
* **Action:** User wants to move "Mr. Hashemi" from *Post A* to *Post B*.
* **Visual Cue:** As the user drags the card, all "Legal" drop zones glow in Green.
* **Validation:** If the user tries to drag a Khadem to a different Zone, the UI shows a "Forbidden" i
* **Smart Highlight:** When a Khadem is selected, all their other slots in the day are highlighted to

### Step D: Finalization
1. User clicks **"Verify"**. System runs a final check on Hard Constraints.
2. User clicks **"Print/Export"**.
3. *UX Touch:* System asks: "Do you want to notify Khadems via SMS?" -> Confirm.

## 3. UI Colors & Accessibility (Mental Model)
* **Active Post:** Solid White Card with Dark Text.
* **Rest/Asayeshgah:** Light Blue/Gray Background (Visual relief).
* **Alerts:** Soft Red Border for empty critical posts.
* **Success:** A small toast notification: "Schedule generated with 98% Fairness Score".
```
